

TENESYS

The logo features the word "TENESYS" in a bold, cyan-colored, sans-serif typeface. The letter "T" is uniquely designed with a horizontal bar extending to the left and a vertical stem that continues downwards as a long, thin line. A second, shorter vertical line is positioned to the right of the "T" stem, and a third vertical line is placed between the "E" and "N". These vertical lines extend from the baseline of the text down towards the bottom of the image. The entire graphic is set against a solid black background.

<p><u>Soal</u></p> <p>The given binary will give you the password... if you meet its criteria!</p> <p>Soal berupa file: skipper-32: ELF 32-bit LSB executable</p>		
<p><u>Solusi</u></p> <ul style="list-style-type: none"> Saat file soal di jalankan, muncul output seperti berikut: <hr/> <p>Output: Computer name: fredrica Sorry, your computer's name - fredrica - is not correct! Killed</p> <hr/> <ul style="list-style-type: none"> Analisa file soal dengan IDA Pro 32bit Berikut isi fungsi sub_804A060 <hr/> <p>Source Code:</p> <pre>int __cdecl sub_804A060(int a1) { int v1; // eax@7 int result; // eax@8 int v3; // ebx@8 char s1; // [sp+10h] [bp-40Ch]@1 char v5; // [sp+11h] [bp-40Bh]@4 int v6; // [sp+410h] [bp-Ch]@1 int *v7; // [sp+418h] [bp-4h]@1 v7 = &a1; v6 = *MK_FP(__GS__, 20); sub_8048871(&s1); printf("Computer name: %s\n", &s1); if (strcmp(&s1, "hax0rz!~")) { printf("Sorry, your computer's name - %s - is not correct!\n", &s1); } }</pre>		

```

        raise(9);
    }
    sub_8048975(&s1);
    printf("OS version: %s\n", &s1);
    if ( strcmp(&s1, "2.4.31") )
    {
        printf("Sorry, your OS version - %s - is not supported!\n",
&s1);
        s1 /= v5 / v5 - 1;
    }
    sub_804880B(&s1);
    puts(&s1);
    if ( strcmp(&s1, "AMDisbetter!") )
    {
        printf("Sorry, your CPU - %s - is not supported!\n", &s1);
        v1 = sys_exit(0);
    }
    sub_8048A63();
    result = 0;
    v3 = *MK_FP(__GS__, 20) ^ v6;
    return result;
}

```

- Program akan membandingkan nama komputer dengan string "hax0rz!~", OS versi dengan string "2.4.31", dan nama CPU dengan string "AMDisbetter!". Apabila semua kondisi terpenuhi maka program akan menampilkan flag.
- Karena itu, kita akan coba untuk melewati semua proses komparasi tersebut.
